New York, March 6. There was a squeeze in money on Wall street to-day. Rates for call loans advanced to 30 per cent tefore 11.30. This tightness was due to the recent exports of gold and the beavy shipments of funds to interior cities. The particular reason for the squeeze to-day was that \$2.00,000 or \$25,000,000 of gold will be exported to Europe to-morrow and the banks called in loans to this amount Friday last in order to get legal tenders, to be presented at the sub-treasury for redemption in gold.
